

World's 1st virtual Laboratory for EM & Antennas

Lecturers contact us for free sample

Study Guide:

This is a 148 page, soft cover book, written by EM lecturers in conjunction with students.

Chapters include background on virtual experiments involving:

- Transmission lines,
- Matching,
- Waves,
- Basic Antennas,
- Array Theory,
- Complex Antennas.

Simulation Software:

The simulation software includes SuperNEC, student tutorials and animated help. The animated help was added in the latest version of SuperNEC and this allows the novice student to familiarise themselves with the software in a short time frame.

Download SuperNEC evaluation from
www.supernec.com.

Lecturers contact supernec@poynting.co.za for a free sample.
